

Dear users,

Company Volter s.r.o. takes the liberty of supplementing the existing Users' manual, which is an inseparable part of each xRover.

During the year 2019 amendments of xRover product will occur in these sections:

Chapter 9.1 Cyclocomputer

In case of increasing users comfort and reflecting their feedbacks of xRover medical stroller/trolley improvements speedometers/cyclocomputers has been replaced by Smart watches for daily use without xRover as well.

We believe that, this exchange bring more users product use value.

User´s manual for Smart watches is included in separate packing inside each new xRover.

Chapter 3.1 Additional parking brake

This type of brake will be mounted/assembled on xRovers medical stroller/trolley during 2019. This concerns models that will be covered by state compensation / reimbursement systems in all countries. If your medical stroller/trolley is not equipped by these additional brakes, it does not have any influence on its right operation or function.

Thank you for understanding

Your Volter s.r.o. team, manufacturer of xRover
